SUMMARY

Pursuing B.Tech in CSE (AI & ML) at VVIT, with a strong foundation in programming, data structures, and basic machine learning. Successfully developed the 2048 Game using Python, featuring interactive gameplay, tile merging logic, and real-time score tracking while showcasing strong problem-solving and programming skills. Skilled in Python and SQL, and interested in learning new technologies and improving problem-solving skills.

EDUCATION

Vasireddy Venkatadri Institute of Technology	2023–2027
Bachelor of Technology of Computer Science and Machine Learning	
NRI JUNIOUR college	2021–2023
Intermediate in MPC	
A.P. Model School	2020–2021
Secondary School of Education	

SKILLS

- **Technical Skills** – Machine Learning, Data Analysis, Problem Solving
 - **Programming Languages** – Python, Java, SQL
 - **Tools & Technologies** – Git, TensorFlow (basic), Google Colab
 - **Core Concepts** – Data Structures, Algorithms, DBMS basics
-

PROJECTS

Built the classic 2048 game using Python by implementing grid-based logic and tile merging mechanics. Designed an interactive interface to handle user inputs and display real-time game updates. Applied concepts like arrays, loops, and condition checks to manage movements and score calculation. The project demonstrates problem-solving skills and game development fundamentals in Python.

CERTIFICATIONS

- Introduction to Large Language Models – NPTEL
 - Joy of Computing using Python – NPTEL
 - Generative AI – Google Cloud (via Google Cloud Skills Boost)
 - Flutter Development Bootcamp with Dart – UDEMY
-

ACHIEVEMENTS

- Successfully developed the 2048 Game using Python, focusing on implementing grid based movement and tile merging logic for smooth game play. Designed an interactive interface to handle user inputs and dynamically update the game state in real time.
- Attended and participated in various college technical events and activities
